

The background features a complex grid of green and purple lines, overlaid with various geometric shapes like circles and squares in red, blue, and purple. The text 'Plot Station Server' is prominently displayed in the upper right quadrant.

Plot Station[®]

Server

Fast, Efficient Network Plotting

Save time, be more productive. Plot Station[®] streamlines plotting on your network and gives you the power to control plot output. Plot without launching the CAD application — what a time-saver! Store and submit plots in ordered sets. Capture, track and report project and accounting data with each plot. Produce multiple plot versions from a single CAD drawing. And, Plot Station is the open systems plotting solution, supporting more input formats, printers, plotters, and networks than any other product. Plot Station is the ideal choice in a mixed CAD, mixed plotter environment. For more information, contact us at 800.800.7568 or visit our web site at www.equorum.com.

"We never have to touch Plot Station. It's one of the best investments we ever made in our CAD system."

"Plot Station is a great product. We run 500 to 600 plots a night without any problems."

"The support from eQuorum is top-notch. They understand our CAD system as if it were their own."

Save Time and Money With Consolidated Plotting Power

Offload plot processing from CAD workstations and centralize it on the network for an efficient client/server plotting solution. Look at these Plot Station advantages:

- Plot without launching the CAD application (or without the CAD software on your PC) — saves time; enables non-CAD users to plot (without buying costly CAD seats!)
- Ideal for mixed CAD environments — same user interface no matter what file formats you plot!
- Plot the same image to multiple devices, including re-sizing plots, optimizing paper usage, adjusting line weights and more.
- Create a set of drawings; reprint any time during the project with just a mouse click — a time-saver!

Open Systems Compatibility Plus Windows[®] OS Stability and Performance

Get all the advantages of a Windows-based platform:

- Multi-tasking for high performance
- Multi-threading for input/output and processing efficiency
- Built-in network security.

Through a modular architecture of input and output drivers, Plot Station can plot nearly any input format on most plotters. Plot Station operates on a Windows platform, on any

compatible network, and can take full advantage of hardware with multiple CPUs.

Get Maximum Plotting Control

Plot Station lets you produce any number of plots from a single drawing — without modifying the drawing. User-defined drawing attribute tables and unique Pen Tables options give you even finer degrees of control. Screen or enhance layers or levels and elements or entities; choose fonts, line styles, colors, and grayscales; select fills and hatching — all at plot time — and all without changing the original drawing.

Easy Configuration

Installation and setup Wizards get you plotting in minutes. There's even point and click setup for advanced options.

View and Control Plots In Progress

Get remote viewing and control of plots in progress — from any Windows-based computer on the network. CAD or project administrators have access to all plots and control of the plotting environment so they can redirect plotting traffic should a plotter go down or load balance between plotters.

Take Advantage Of Advanced Printer and Plotter Features

Maximize your hardware investment! Take advantage of your plotter's advanced features, such as collated sets, stackers, folders, media selection, and more!

Capture, Track and Report Plot Data for Accurate Billing and Chargebacks

Keep your budget under control by ensuring you bill for all reimbursable expenses with Plot Station's DataTracker. Plot Station automatically logs information on plotting activity. You decide which data to record for plot jobs. The log creates a Microsoft Access-compatible database for easy review and use of the collected data. Or, you can send the data to a spreadsheet.

Quality Service, Support And Maintenance

eQuorum stands behind our systems with technical support and free product updates during the eQuorum Warranty Period. At the end of the Warranty Period, Service Contracts are available for continued support and assistance. eQuorum also offers training and on-site professional services.

Supported Input And Output Drivers

Input Drivers

- MicroStation DGN
- AutoCAD DWG
- Autodesk Revit
- Autodesk Inventor
- HPGL, HPGL/2
- CalComp 907
- I/RAS
- HMR products
- Raster Formats
 - CALS – I/RAS CIT
 - TIFF – I/RAS COT
 - PCX – I/RAS RGB
 - Targa – TG4
- PostScript Level I and II
- Adobe PDF
- SolidWorks
- Windows applications
- Microsoft Office

Output Drivers

- Adobe PDF
- CalComp 907
- CalComp CCRF – color/mono
- CalComp TechJet
- CALS
- Canon imagePROGRAF Series iPF78x
- Canon imagePROGRAF iPF8x0
- Canon image PROGRAF TX-3000
- Encad
- HP DesignJet (resolution configurable HP-RTL)
- HP DeskJet
- HP-PCL5 – color/mono
- HP-PCL6 – color/mono
- HPGL
- HPGL/2
- JDL 3500
- JDL 4000
- JDL 5000
- JPEG and PNG
- JRL 9000
- Kyocera/Mita (some models)
- KIP 800K
- KIP 1020
- KIP 2000
- KIP 3000
- KIP 5000
- KIP 6000
- KIP 7000
- KIP 7770K
- KIP 8000
- KIP 9000
- KIP 7100
- KIP 7700
- KIP 7900K
- KIP 7900
- KIP 9900
- KIP Color 80
- Océ 7700
- Océ 9400
- Océ 9600
- Océ 9700
- Océ 9800
- Océ TDS 320
- Océ TDS 400
- Océ TDS 600
- Océ TDS 700
- Océ TDS 800
- Océ PlotWave 300 Series
- Océ Plotwave 500
- Océ ColorWave 300
- Océ Colorwave 500
- Océ ColorWave 600
- PostScript color/mono
- Ricoh (some models)
- TIFF Group 4
- TIFF (multi-page)
- Xerox Synergix 8825
- Xerox Synergix 8850
- Xerox 8825
- Xerox 8830
- Xerox 8830 DDS
- Xerox 8855
- Xerox 8150
- Xerox 8180
